

THE FUTURE — ORIENTED SYSTEM FROM DECA®

Our trademark DECA® stands for superb quality a symbol signifying our full commitment and responsibility for each piece of our products in consideration of the wide usage of switches and indicators which are almost indispensable to electrical control facilities for machinery equipment

It is absolutely necessary to install switches and indicators with superb quality and appearance onto the machinery equipments which will not only increase appearance and the added values but also will minimize maintenance costs in future in addition to a direct contribution to better profitability of the products.

It is therefore essential for engineers and machine designers to make meticulous selection of the most reliable switches and indicators.

16 SERIES PUSHBUTTON SWITCHES AND INDICATORS

18 × 18

ϕ 18

18 × 24

indicator

1 pole

2 poles

3 poles

4 poles

According to performance, 16 series pushbutton switches can be further categorized into the following 3 types:

- (1) Illuminated push-button switch (Momentary or Alternate action)
- (2) Non-illuminated push-button switch (Momentary or Alternate action)
- (3) Pilot indicators.

In terms of shapes our products can be divided into three types.

- (1) Round type (Dia 18mm)
- (2) Rectangular type (18 × 24mm)
- (3) Square type (18 × 18mm)

The aforesaid big variety offers a high flexibility for you to meet the actual requirements for functions and shapes. However, the mounting hole diameter for all the products is 16mm. For the mounting, just have the nut at the rear of the panel fastened in a very convenient way.

Our contactors are with quality silver contact points so as to ensure electrical stability and the life span. Each contact block has N.C(Normal Close) contact points and N.O.(Normal Open)contact points. Code number 1-2 for wiring stand for N.C. contact points: whereas 3-4 stand for N.O. contact points Each switch may have a maximum of 4 contact blocks: which means that total contact points will have 4 NC's and 4 NO's As each block is of independent device. wiring work can be done simultaneously by use of different voltages, but the contact points for N.C. or N.O. of the contact block must not be simultaneously connected to different voltages, except for the voltage lower than 40V AC/DC. The tags with code a-b are exclusively for indicators: if LED is to be used as the indicator, then tag b is positive pole. Push-cap can be replaced, and legend plate can be inserted between color cap and lens.

Product specifications:

Switch system	Each contact block has one double break snap action switching mechanism.											
Switch mode	Momentary or alternate action. 1-4 poles											
Contact material	Soldering type - silver is standard; socket type - pin with golden plating.											
Body material	High-grade temperature resistant thermoplastic. Contact housing moulded in electrical high-grade thermosetting plastic.											
Operating travel	3.0 mm.											
Actuating force	2-5N depending on no. of contact block.											
Mechanical lifetime	> 2 million operations.											
Electrical life time	<table border="0"> <tr> <td>alternate action</td> <td>momentary action</td> </tr> <tr> <td>5A/250V AC > 5.0×10^4 operations</td> <td>> 2.5×10^4 operations</td> </tr> <tr> <td>4A/250V AC > 1.2×10^5 operations</td> <td>> 6.0×10^4 operations</td> </tr> <tr> <td>2A/250V AC > 4.0×10^5 operations</td> <td>> 2.0×10^5 operations</td> </tr> <tr> <td>1A/250V AC > 8.0×10^5 operations</td> <td>> 4.0×10^5 operations</td> </tr> </table>		alternate action	momentary action	5A/250V AC > 5.0×10^4 operations	> 2.5×10^4 operations	4A/250V AC > 1.2×10^5 operations	> 6.0×10^4 operations	2A/250V AC > 4.0×10^5 operations	> 2.0×10^5 operations	1A/250V AC > 8.0×10^5 operations	> 4.0×10^5 operations
alternate action	momentary action

SOLDERING TYPE PUSHBUTTON SWITCHES & INDICATORS ORDER INFORMATION

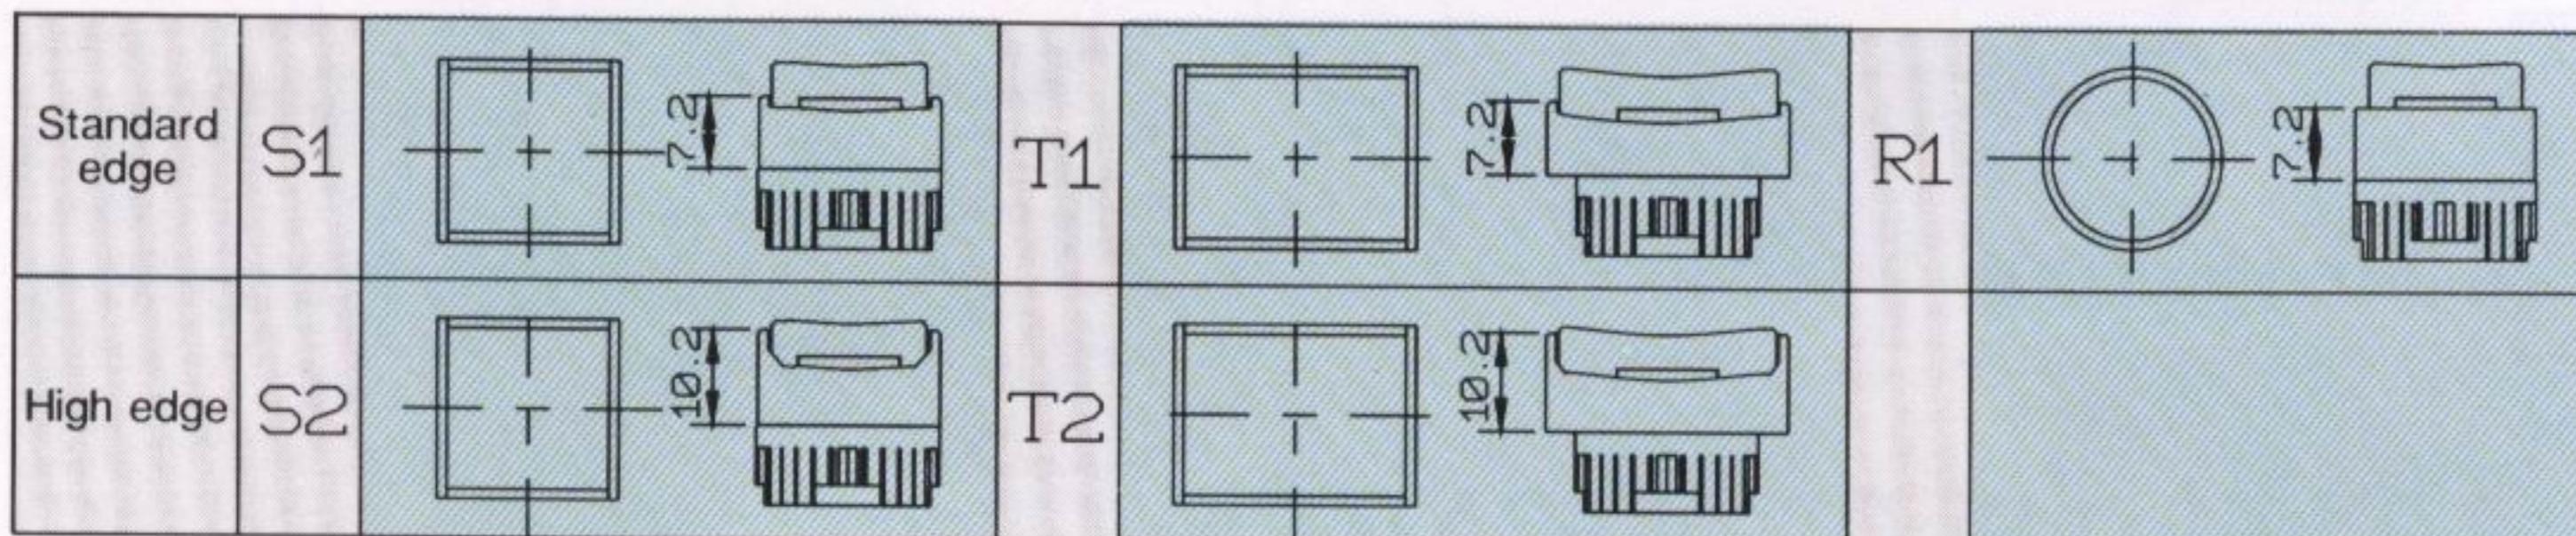

Order no : D16 -

ϕ 16 mm basic type: _____

Functions : _____

- LA : Soldering type pushbutton switches with alternate action
- LM : Soldering type pushbutton switches with momentary action
- PL : Pilot indicator

Pushbutton Head : _____

Contact Arrange : _____

- 000 : Non contact
- 1ab : 1 NO + 1 NC
- 2ab : 2 NO + 2 NC
- 3ab : 3 NO + 3 NC
- 4ab : 4 NO + 4 NC

Lamp and Voltage : _____

0 : Without lamp			
A : Incandescent	6 V	AC/DC	200 mA
B : Incandescent	14 V	AC/DC	80 mA
C : Incandescent	28 V	AC/DC	40 mA
F : Neon	110 V	AC	green / red
G : Neon	220 V	AC	green / red
H : LED	6 V	DC	green / yellow / red
J : LED	12 V	DC	green / yellow / red
K : LED	24 V	DC	green / yellow / red

Special type :

M : Incandescent	6 V	AC/DC	40 mA
N : Incandescent	14 V	AC/DC	40 mA
L : Incandescent	33 V	AC/DC	35 mA
D : Incandescent	48 V	AC/DC	25 mA
E : Incandescent	60 V	AC/DC	20 mA

Color Lens :

- | | | |
|----------|-----------|------------|
| B : Blue | G : Green | O : Orange |
| R : Red | W : White | Y : Yellow |

Order Example :

If you want to order a round head illuminated pushbutton switch with a yellow color lens 60V DC 20 mA incandescent lamp, 3NO +3NC contacts, alternate action

It's order # as : D16LAR1-3abEY

If you want to order a rectangular head pushbutton switch with high edge, non-illuminated and red color lens, 2NO + 2NC contacts momentary action

It's order # as : D16LMT2-2abOR

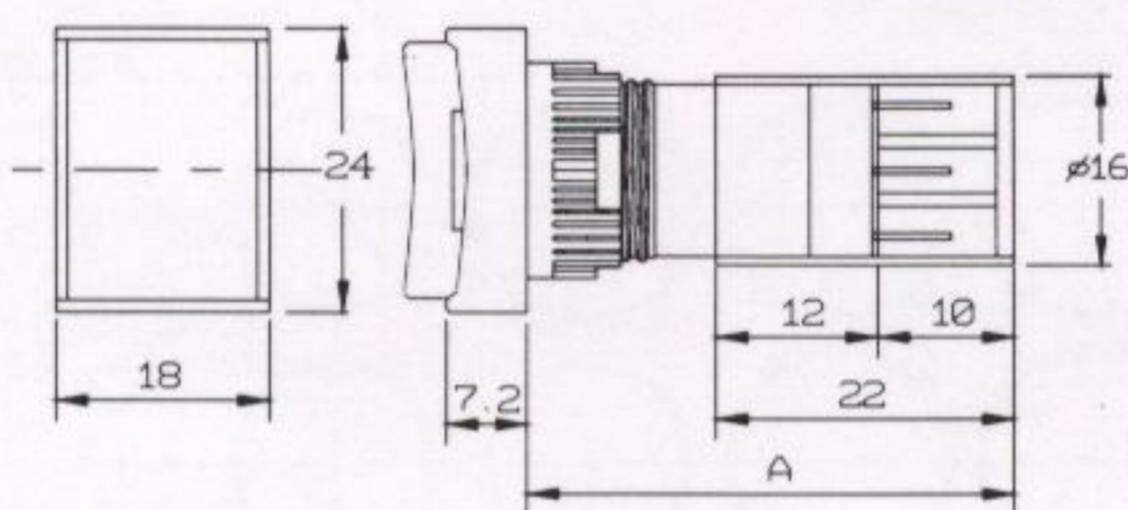

If you want to order a square head pilot indicator with standard edge, blue color lens, 28V DC 40mA incandescent lamp.
It's order # as : D16PLS1-000CB
