Note :

Measurement made using a POWER_TABLE entry of TX_PRE 80, INT PA63, EXT PA255. This ensures that the Bluetooth requirements for ACP and those defined by the FCC and ETSI are satisfied over the operating temperature range of -5°C to +45°C. Although the design is capable of generating in excess of +18dBm, regulatory compliance over the full temperature range of -5°C to +45°C will not be satisfied if the transmit power approaches this value.
